Subject: Anne's talkers for Baker Botts
Attachments: Baker Botts - Idsal - 2.25.20.docx

Hi Anne,

Attached are some talkers for tomorrow's presentation at the Baker Botts event. They are very long – I've opted to include more and let you cut what you like.

The first part of the presentation is an updated version of the priorities speech (very similar to Karl's talkers for America's Power last week, with the addition of talkers on oil and gas).

The second part has talkers on a number of topics specific to Texas, including ozone issues, exceptional events, and international transport (highlighted in yellow). There are some other items in that section, as well as ozone-related litigation. It's a fairly long doc, but again, you'll probably want to cut some things.

If you have any questions this evening or in the morning, please let me know and I'll do my best to get you a response asap.

Thanks,
Isabel
